Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over
McDaniel US Patent No. 6,663,659 in view of Altshuler US Patent No. 6,508,813.

McDaniel discloses apparatus and method for illuminating a zone of mammalian skin as claimed with the exception of a suction cup, the apparatus comprising: a plurality of light emitting diodes; and applicator movable to direct light emitted from the LEDs to the desired skin zone; and a controller adapted for controlling duration and/or intensity of the light delivered to the skin.

However, the use of suction cup to hold body tissue in relation to a treatment apparatus is known in the art. Altshuler discloses an alternative dermatological treatment apparatus and methods of use, the apparatus comprising a treatment light source and a suction cup adapted to engage and hold body tissue in relation to the light source.

Hence, at the time of the applicant's invention, it would have been obvious to one of ordinary skill in the art to modify McDaniel in view of Altshuler and use a suction cup in order to position/place the treatment apparatus on the body tissue being treated.
